EXHIBITION 2013

## SHARING EXPERIENCES - SHARING LIVES

Between 1948 and 1973, for a period of 25 years, as many as 100,000 nurses from the Caribbean and Africa came to work and train as nurses in the NHS.

The average age of the Windrush nurses was 19, many of whom would go on to dedicate over 40 years to the health service. These nurses worked tirelessly to ensure the health and wellbeing of all patients whilst making the NHS the envy of the world; yet there has been little recognition or acknowledgement of their outstanding contribution - until now.

We invite you to share their experience.
